American Geophysical Union, United States, 2007. Paperback. Book Condition: New. 274 x 224 mm. Language: English . Brand New Book. Groundwater is a critical resource and the PrinciPal source of drinking water for over 1.5 billion people. In 2001, the National Research Council cited as a grand challenge our need to understand the processes that control water movement in the subsurface. This volume faces that challenge in terms of data integration between complex, multi-scale hydrologie processes, and their links to other physical, chemical, and biological processes at multiple scales. *Subsurface Hydrology: Data Integration for Properties and Processes* presents the current state of the science in four aspects: Approaches to hydrologie data integrationData integration for characterization of hydrologie propertiesData integration for understanding hydrologie processesMeta-analysis of current interpretationsScientists and researchers in the field, the laboratory, and the classroom will find this work an important resource in advancing our understanding of subsurface water movement.
