## Memoires de Chymie (12)

By -

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 52 pages. Original publisher: Washington, DC : Western Energy and Land Use Team, Office of Biological Services, Fish and Wildlife Service, U. S. Dept. of the Interior, 1982 OCLC Number: (OCoLC)311867477 Subject: Reservoir ecology. Excerpt: . . . Multiple regression analysis. Multiple regression analysis was used to quantify relationships between environmental ( independent ) variables and harvest of selected fishes ( dependent variables ) in reservoirs with coolwater, coldwater, and seasonal or two story fisheries. In this procedure, variation in environmental factors is used to explain variation in harvest of fish. The predictive value of any environmental factor is determined by how well a unit change in that factor is related to a unit change in harvest of a particular species. It is assumed that the environmental variables that provide the greatest predictive value are biologically important, although high correlation does not necessarily imply a cause and effect relationship. Multiple regression models relating environmental variables and harvest of selected fishes were developed from the SAS-79 stepwise method of maximum  $R^2$  improvement ( Barr et al. 1979 ). This procedure selects independent variables from all available combinations on...

### Reviews

*This ebook is definitely not simple to begin on reading but really enjoyable to read through. This really is for all who statte that there had not been a worth reading. You may like how the author publish this ebook.*

-- **Demetrius Buckridge**

*This book may be really worth a read through, and a lot better than other. It is really basic but excitement inside the 50 % in the pdf. I realized this pdf from my dad and i encouraged this publication to learn.*
