Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1888 edition. Excerpt: .19. Seeds of different species may vary in sprouting in reference to weight. 20. The color of the seed in some cases is a tolerably accurate measure of rapidity and per cent. of sprouting. 21. When there is any variation in viability in reference to color, it is usually found that the stronger sproutings occur in the darker colored seeds. 22. The relative values of seeds of different colors vary with each species, or sometimes with each sample. 23. The latitude in which seeds are grown may determine their behavior in germination. 24. Northern grown corn appears to germinate quicker than southern grown corn. It is to be expected, from our knowledge of the variation of plants in reference to latitude, that seeds of most species will give similar results. 25. Variation in results of seed-tests may be due to the apparatus in which...
