

## A Treatise on Comic Sections and the Application of Algebra to Geometry (Paperback)

Filesize: 6.52 MB

### ***Reviews***

*Merely no terms to spell out. We have read through and i also am confident that i will gonna read yet again again in the future. You will not sense monotony at anytime of your own time (that's what catalogs are for about should you question me).*

*(Pasquale Larkin I)*

## A TREATISE ON COMIC SECTIONS AND THE APPLICATION OF ALGEBRA TO GEOMETRY (PAPERBACK)

To get **A Treatise on Comic Sections and the Application of Algebra to Geometry (Paperback)** eBook, remember to click the web link below and download the ebook or have accessibility to other information that are relevant to A TREATISE ON COMIC SECTIONS AND THE APPLICATION OF ALGEBRA TO GEOMETRY (PAPERBACK) ebook.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1845 Excerpt: .D . 196. All parallelograms whose sides touch a hyperbola and the conjugate hyperbola at the extremities of a pair of conjugate diameters, are equal to one another. Draw PF perpendicular to CD (fig. 58), then (Art. 191) area of whole parallelogram = 4 CD. PF = 4 CD. C T sin TCP j / g = 4Z)J/.C77 = 4--.--, = 4a6. a x 197-Draw the diagonal CL (fig. 58), which will pass through the middle point of DP, whose co-ordinates are equal +CN), which value is independent of the positions of CP and CD; hence the parallelograms whose sides touch a hyperbola and its conjugate at the extremities of a pair of conjugate diameters, are not only equal in area, but they all have their diagonals in the same line; namely, the diagonal of the rectangle whose sides are the semi-axes. 198. If we denote CP, CD, by a , b , and z PCD by 7, we have PF = a sin 7, and.-. a b sin y = CD x PF = ab. Also if we denote PF by p, we have the relation between the central distance of any point and the perpendicular from the centre upon the tangent at that point, CD a 2-a2 + b2 The magnitude and position of two conjugate diameters that include a given angle, may be determined in the same manner as for the ellipse (Art. 145). 199-The rectangle contained by the focal distances of any...
