Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from A Course in Experimental Psychology The portion of the course which follows will be found to treat of the senses only, and indeed not fully of them, for it still lacks a chapter upon some of the most interesting experiments in vision. The author's excuse for allowing the publication, even in this modest form, of so incomplete a work, must be the very extraordinary condition of experimental psychology at this time. Many laboratories have been opened, and many teachers of psychology are anxious to give their students the benefit of demonstrations and practice work, and yet there is absolutely no laboratory handbook of the subject to be had. At such a time half a loaf may be better than no bread - at least, so a number of the author's professional friends have seemed to believe; and, since the completion of the whole must be still further delayed, he offers this half loaf. The course as planned consists of two parts: Part I on sensation and perception; and Part II on more complex mental phenomena. Part I needs three chapters more to complete it: Chapter VII, on the Visual Perception of Extent, Distance, Direction, and Motion; Chapter VIII, On the Psychophysics Methods and Weber's Law; and Chapter IX, On Apparatus for the Study of the Senses. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
