# Automatic Reconstruction of Triangular Meshes from Point Sets

Filesize: 8.49 MB

Reviews

The book is great and fantastic. It is writter in straightforward words and phrases rather than difficult to understand. You wont really feel monotony at at any time of your respective time (that's what catalogues are for regarding should you question me).
(Payton Miller)

AUTOMATIC RECONSTRUCTION OF TRIANGULAR MESHES FROM POINT SETS

To read **Automatic Reconstruction of Triangular Meshes from Point Sets** PDF, make sure you access the hyperlink listed below and save the file or have accessibility to additional information that are relevant to AUTOMATIC RECONSTRUCTION OF TRIANGULAR MESHES FROM POINT SETS book.

LAP Lambert Academic Publishing Apr 2016, 2016. Taschenbuch. Book Condition: Neu. 220x150x10 mm. This item is printed on demand - Print on Demand Neuware - 'Constructing polygons or polyhedra with well-defined properties from a set of general points has been an active area of research since the inception of computational geometry. Some examples include convex hull, shape characterizing polygons, bounding boxes, convex and non-convex k-gons, k-holes, optimal area and perimeter polygonizations. This book delineates algorithms, theory and the experimental results on constructing constrained triangular meshes from point clouds. In particular, two geometric reconstruction problems have been covered. 1. Shape reconstruction and 2. Polygonization with optimal area. Both these problems have been discussed in three dimensions, where one of the problems focuses on reconstructing closed water-tight surfaces from three dimensional point sets and the other, addresses the polyhedronization of point sets with volume constraint. Discussed problems are relevant with numerous applications in computer graphics, computer vision, pattern recognition, geographical information science (GIS),4D printing and surface lofting, among others.' 160 pp. Englisch.
